#### Inhalation

No ill effects expected.

If exposed/feel unwell/concerned: Get medical attention.

#### Eye Contact

Wash immediately with large volumes of fresh water for at least 15 minutes. Get medical attention.

#### Skin Contact

Wipe off with a towel. Wash with soap and water. Get medical attention if irritation persists.

#### Ingestion

Ingestion is not a likely route of exposure. Get medical attention if you feel unwell.

---

### SECTION 5) FIRE-FIGHTING MEASURES

---

#### Suitable Extinguishing Media

Use extinguishing media suitable for surrounding fire.

#### Unsuitable Extinguishing Media

None known.

#### Specific Hazards in Case of Fire

Not classified as flammable but contains a flammable propellant. Contents under pressure. Burning may produce silicon oxides; carbon oxides. Exposure of containers to heat and flames can cause them to rupture often with violent force.

#### Fire-Fighting Procedures

Water may be used to cool containers to prevent pressure build-up and explosion when exposed to extreme heat.

#### Special Protective Actions

Firefighters should always wear positive pressure self-contained breathing apparatus and full protective clothing. Cool fire-exposed containers with water. Use shielding to protect against bursting cans.

## SECTION 6) ACCIDENTAL RELEASE MEASURES

### Emergency Procedure

Ventilate the area. Wear appropriate protective clothing and equipment.

### Recommended Equipment

Wear appropriate protective equipment (see Section 8).

Place leaking can in a pail in a well-ventilated area until pressure has dissipated. Collect residual liquid using inert absorbents and place into a suitable container for disposal.

### Personal Precautions

Avoid breathing vapor. Avoid contact with skin, eye or clothing. Do not touch damaged containers or spilled materials unless wearing appropriate protective clothing.

### Environmental Precautions

Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases.

## SECTION 7) HANDLING AND STORAGE

### General

Avoid contact with eyes and skin. Avoid breathing vapors or gas. Use only with adequate ventilation. Wash thoroughly with soap and water after handling. Contents under pressure, do not puncture or incinerate containers.

Do not puncture or incinerate (burn) cans. Do not spray in eyes. Do not take internally.

### Ventilation Requirements

Use in a well-ventilated place.

### Storage Room Requirements

Store in a cool, dry, well-ventilated area, away from strong oxidizers and other incompatible materials. Do not store in direct sunlight or above 120°F.

## SECTION 8) EXPOSURE CONTROLS, PERSONAL PROTECTION

### Eye Protection

Safety glasses with side shields should be used if indicated. Eye wash and safety showers in the workplace are recommended.

### Skin Protection

Use solvent-resistant protective gloves for prolonged or repeated contact.

### Respiratory Protection

In restricted areas, use approved chemical/mechanical filters designed to remove a combination of particles and vapor. In confined areas, use an approved air line respirator or hood. A self-contained breathing apparatus is required for vapor concentrations above PEL/TLV limits.

### Appropriate Engineering Controls

Ventilation should be sufficient to prevent inhalation of any vapors.
